GRAYLING, MICHIGAN, JUNE 14, 1928

OSCAR P. SCHUMANN, Editor and Proprietor

NUMBER 24

NAT. GUARD OFFICERS VISIT GRAYLING

PLEASED WITH CONDITIONS OF CAMP

Col. LeRoy Pearson, Col. J. S. Bersey, Col. Burt and a son of Col. Bersey, all of Lansing, arrived by auto Saturday forenoon. Col. Craft and four staff officers of the 202d Coast Artillery of the Illinois National Guard arrived on the afternoon train. The parties left soon after for Camp Grayling where they found the camp looking ideal.

The 202d Coast Artillery regiment is from Chicago. They held their first camp here last year and were stationed near the front entrance of the camp. This year they will occupy the space used by the 110th Mich. Field Artillery, close to the rifle range. Col. Kraft says he is well pleased with the new location, saying that it will be nearer to their work and more convenient to their practice.

In a letter to the visitors, Col. Kraft said that the people of Grayling were glad to see them again, a few members of the Board of Trade tendered them a dinner at Shoppenagors Inn Saturday evening. While awaiting for the guests to assemble, Col. Glen Arnold of the Signal Corps of Ypsilanti, and Major Evans of the Air Force, and other aviators arrived by plane and joined with the other officers. Among the speakers at the table were Rev. Greenwald who made the visitors understand that we were glad to have them here; Col. Pearson and Col. Bersey of Michigan National Guard; Col. Kraft of the 202d Field Artillery; T. W. Hanson and Col. Meyers, an officer of the 6th Corps area, of the Federal Army.

There is a most cordial spirit existing among the people of Grayling and the officers of the military organizations that come to our camp. And too, judging from some of the remarks made by some of the speakers, the spirit of cooperation between the Michigan and Illinois National Guard officers is excellent. In his address Col. Kraft stated that he hoped a way may be found by which their organization may be privileged to store some of their equipment in Camp Grayling so as to save transportation back and forth from Chicago to camp. And that would indicate that they were planning to come here annually, which will be glad news for the business houses here and those who enjoy camp social seasons.

Col. Meyers of the Federal Army stated that the government intended to install a sewage system in camp just as soon after the closing of the summer camps as possible, which would cost in the neighborhood of \$125,000. About \$80,000 is already being spent for improvements of the camp this year. According to Col. Bersey the military department is laying plans to attach several thousand acres to the southwest of the camp, to extend the artillery ranges, and for general uses of the camp. Camp Grayling is already famous for being the most beautiful military camp in America and is fast becoming the most useful camp. Its usefulness is no longer confined to the lighter artillery but its ranges accommodate the largest artillery pieces in use today.

The 202d C. A. officers boast of a new search light that is equal to the latest in use anywhere in the service. The lens of this light is more than six feet in diameter. This will be in use at Camp Grayling next July 7th to 21st. The first units of the Michigan National Guard are scheduled to arrive July 23rd, and the last to leave will be on August 20th.

The officers of the Illinois Guard left Saturday evening by auto for

School Notes

Editors: Isbrand Harder, Ellen Speck, Corinne Sheldon.

The final week of school is drawing to a close and parties have been enjoyed by many of the classes.

The Campfire Girls are going camping at Kile Lake Tuesday, June 19th. The students of Grayling School are glad to have had Mr. Smith, with them during the past six years and wish him the best of success in his new position.

The Baccalaureate sermon was given in the M. E. Church last Sunday evening. An excellent sermon was rendered by Rev. Greenwald.

Miss Clark (in Ancient History) "When was the revival of learning?" Ellen S. "Before the final exam."

Stanley—Do you play on the piano? Clara—I did until I got so big that I felt off.

Two vacations a month are recommended by a New York physician, but he fails to tell how to get them.

Mr. Cushman (in occupation class) "Name some production in which the supply exceeds the demand." Chuck W. "Trouble."

Truman—Say, there's to be a big dance at the depot tonight. Ruth C. "Who's giving it?" T. L. "Two trains are going to Charleston."

A good thing to remember and a better thing to do, is to work with the construction gang.

And not the working crew.

Marie—And you're thinking in your French exam? I can't understand it. Thorwald—Neither can I. That's why I flunked.

Mr. Smith—What does "As" stand for? Paul—It's got it on the end of my tongue.

Mr. Smith—Then spit it out! Quick! It's arsenic.

A dance, a date, perhaps out late.

A test, a quiz, I'll pass, Gee-whizz!

At 10:30 a. m. the pastor will speak on the theme, "The Song My River Sings to Me." When Jesus was here on earth, he was constantly using nature to illustrate spiritual truth. It was the Master's way. Shall it not be ours?

At 8:00 p. m. the evening service will be unusual in title and material. The theme is "The greatest question in the world." It is beautifully illustrated by artist's conceptions of Bible scenes, and is the last address in the series "Five Crises in the Life of Christ." You will want to see these pictures and hear this address. A hint of truth for High School Graduates.

"The ultimate test of a state university is the moral and religious character of its graduates."—Marion Leroy Burton, the late lamented President of the U. of M.

Whitman's small packages of brittle peppermints and caramels are good. Made since 1842 and still going strong. Central Drug Store.

OUR NEW GRADUATES

Each year we have the pleasure of welcoming into business and social life a new group of young folks who have just completed their high school education.

These graduates bring into active being an added impetus, a new life force that carries onward with force that none can deny, the business and the social activities of the community.

Each line of endeavor into which this new energy is injected feels the onward urge and in the strides of progress made, shows the great value to the community at large which this vital force brings.

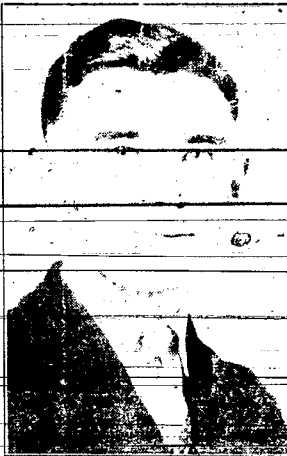

Youth-power, as exemplified by the new graduates from our schools, is the basic hope of this community's future growth and prosperity.

MUSIC PUPILS TO GIVE RECITAL

MRS. CLIPPERT INVITES ALL TO PIANO AND CONCERT PROGRAM

Mrs. C. G. Clippert's pupils in piano and vocal music will give a recital at the Michelson Memorial church next Monday evening, June 18th, beginning at 8:00 o'clock. In addition to the pupils, Misses Margrethe and Ella Hanson, who are home from the Bennett school of Millbrook, N. Y., are to render selections.

It is always interesting to hear what our young girls and boys are doing and the public is cordially invited to attend the recital that evening. The program to be given is as follows:

PIANO DUET—Dance of the Fairy Queen L. A. Hugbee

WAYNE NELLIST, MRS. CLIPPERT

PIANO SOLO—In the Month of May Francois Behr

VIVIAN NELLIST

PIANO SOLO—To Arms March Walter Rolfe

DOROTHY WAKELEY

PIANO SOLO—Rain Patter James H. Rogers

VIVIAN DAWSON

PIANO TRIO—Valse L. Streabhog

DOROTHY WAKELEY, VIVIAN DAWSON

HELLEN MCLEOD

PIANO SOLOS—Merry Villagers Walter Rolfe

A Fairy Song Ora Hart, Weddle

HELLEN MCLEOD

PIANO SOLO—In the Pine Woods L. Renk

MARGARET WOOD

PIANO SOLO—Ripples Paul Lawson

MABLE ISENHAUER

VOCAL DUET—Carmena H. L. Wilson

MARIE SCHMIDT, VELLA HERMANN

PIANO SOLO—Little Maid Gavotte Edwin Forest

BEVERLY SCHAIKLE

PIANO DUET—Alentean Fete A. Sartorius

BEVERLY SCHAIKLE, MRS. CLIPPERT

PIANO SOLO—Dancing Butterflies J. E. Roberts

MARGARET KESSELER

PIANO SOLO—Welcome Carl Ganschals

LORETTA SORENSON

PIANO SOLO—Lonely Wanderer Alban Forster

ELEANOR LAND

PIANO SOLO—On a Summer Evening Wallace Johnson

MARQUITA LAND

PIANO DUET—Enchanted Moments Adam Geibel

MARQUITA LAND, ELEANOR LAND

VOCAL SOLOS—His Lullaby Carrie Jacob Bond

Who Knows E. Baer

VELLA HERMANN

PIANO SOLO—Night Scene Joseph Pastenack

PERN CHALKER

PIANO SOLO—Fairies James H. Rogers

GEORGIANA OLSON

PIANO DUET—Qui Vive W. Gantz Op. 12

ELAINE REAGAN, GEORGIANA OLSON

PIANO SOLOS—Summer Morn George Eggeling

Zingalesca George Eggeling

MARION HANSON

LADIES SEXTETTE—Miss Marie Schmidt, Mrs. Milnes, Mrs. H. Gothro, Mrs. Frank Tetu, Miss Vella Hermann, Mrs. H. Jarmine

PIANO SOLO—The North Wind Carl N. Kem

ELAINE REAGAN

PIANO SOLO—Spinning Wheel Wilson G. Smith

JANE KEYPORT

TWO PIANOS—Hungary Rhapsodie Mignonne Carl Koelling

MARIE SCHMIDT — NELS OLSON

JANE KEYPORT — MRS. CLIPPERT

MRS. C. O. McCULLOUGH INJURED IN AUTO ACCIDENT

Mrs. Charles O. McCullough suffered a number of severe cuts and bruises when an auto in which she was riding upset due to a tire blow-out.

The accident occurred about 40 miles west of Point St Ignace when she was returning with her sister and husband, Mr. and Mrs. J. P. McKian of Wolverine, from Shawano, Wis., where they had been to attend the graduation of a niece, Mrs. McKian also received some bad injuries including a fractured arm and ankle bone. Mr. McKian escaped uninjured. They were taken to St. Ignace where the injured ladies were looked after. They later continued their journey to Wolverine.

Lough reports that his wife is getting along as well as may be expected and hopes to return home soon.

BIG CROWD AT ELKS DANCE

OVER \$500 RAISED FOR MERCY HOSPITAL

From the time the crowd began arriving at the Officers' Club house last Friday evening to attend the Elks dancing party, until Home Sweet Home was played by the orchestra, there was one continual round of pleasing and cheering. All the while it was a rainy evening there was a large crowd present, and everyone seemed to be having the best of times.

The Elks who were responsible for the fine affair, which turned out to be such a huge success both socially and financially are C. J. McNamara, George Burke, Emil Kraus, Mike Costello, Mac McGivray, William Lovell and T. W. Hanson, and they are assisted by a number of Grayling Past-106 American Legion. The purpose of the party was a most worthy one, that all proceeds would go to Mercy Hospital. As yet the total amount has not been arrived at but will be something over the \$500 mark which is exceptionally fine and no doubt will be highly acceptable to the Sisters of Mercy at this time.

Music for dancing which began at 9:00 o'clock was furnished by William Schram, Red Stripes, who are playing at Colleen's pavilion this season, and who have become favorites in this section. There were many dancers and at times there was scarcely room on the floor to hold them all. The music was full of pep and both old and young danced.

There were a number of special features during the evening, and of which was the many selections rendered by the Elks Society of Gray City, who had been invited for the evening. They proved themselves very able entertainers and were loudly applauded each time they appeared. "Bill" Powell gave a couple of recitations, the first of which was "Special Sessions" of which he is the composer and the second one "Whispering Will." Both were highly enjoyed. There were only two participants in the Old Time Fiddle contest, George E. Beck, a well known farmer of Beaver Creek and the other Mr. Nelson of Pile Lake. They each played three of the old time airs alternately, and both did so well that it was hard for the judges to distinguish just who played the best so the honors were divided evenly. The prizes were \$25.00 and \$15.00.

At the 11th hour, which has a beautiful significance in the Elks Lodge, the lights were turned out in the dance room and there was a pause of a minute or so. This time was devoted to thought of absent brothers of the lodge.

Refreshing drinks and ice cream cones were sold by the ladies of the League of the Little Flower during the evening and also lunch was served by them to all who wished it. Their efforts were rewarded by the sum of some \$80 which they turned over to the hospital. Mrs. George Barker had charge of the refreshments.

A beautiful basket holding an assortment of cut flowers was auctioned off during the evening and it went to the highest bidder who was Frank

O. Rockwell of Gaylord. This was donated by the Grayling Greenhouses.

All expense of the party is to be paid by the Elks so whatever was taken in goes into the fund for the hospital. The fine spirit that goes with their efforts is highly commendable and these gentlemen, who we mentioned above are to be congratulated for their thoughtfulness. The party marked one of Grayling's most pleasant affairs.

10,000 LOAVES BREAD DAILY CAPACITY

NEW OVEN AT MODEL BAKERY BIG IMPROVEMENT

A. R. Craig says he is used to having up to date apparatus to work with and has just finished installing a fine new double oven with a baking capacity of 10,000 loaves of bread daily.

"After the oven is once heated, it holds heat several days and the heat is always even and steady," said Mr. Craig. "Beneath the oven is a heavy bed of crushed fire brick that he

comes very hot and continues to hold the heat even after the fire in the pit has burned out, and we can always tell just exactly the temperature of our ovens and the loaves come out evenly baked and browned. It makes no difference whether there are a dozen loaves or several hundred, the baking is just right every time."

The writer witnessed the "baking" bread from the ovens one day this week and it certainly was a grand sight to see so many loaves and all looking so clean and brown. The loaves were laid on ventilated racks for cooling and later were taken to the wrapping machine where each was enveloped in a special waxed paper and automatically sealed.

This bakery makes several kinds of bread. There is the "Home Town" loaf that is so popular among most of the families. The "Butter Crust" loaf is like the very finest kind of home made bread. It costs a little more than the other but is a kind that some housewives want. The "Potato Bread" is a round loaf and has won high favor. And their favorite "Salt Rising" loaf too is in great demand.

Mr. Craig is certainly a wonderful baker and knows just how to make the kinds of baked goods that the people like. A new cake machine too has just been installed. This machine increases the capacity of production and gives a much more even and finer mixture. This is used for cakes and rolls of all kinds. This bakery is already drawing trade from outside towns and it is hoped by its owner that it won't be long before he will have a patronage built up that will keep the place busy. By buying Grayling-made bread you will not only get the finest quality but will also help to build up a local industry.

ANNUAL SCHOOL MEETING MONDAY

There was a fair size attendance at the Annual School meeting Monday evening at the School auditorium. While the business that was to come before the meeting was very important, it didn't take long to dispose of it.

Due to a change in the school laws it wasn't necessary to read the financial statement of the board, thus eliminating a long, tedious job. Dr. C. R. Keyport, president of the Board of Education, called the meeting to order and Secretary M. A. Bates read the minutes of the last annual meeting, which stood approved.

The budget for appropriation for the next year, as determined by the Board was read, and was as follows:

Teachers Salaries	\$20,000
Fuel	2,500
Incidental Expenses	5,000
Officers Salaries	500
Total	28,000

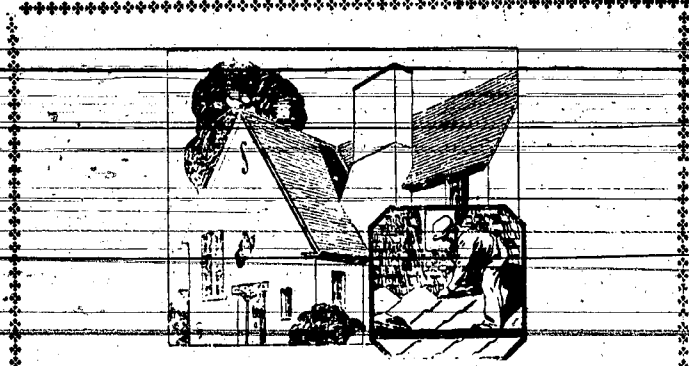

This was approved and voted by the meeting.

Dr. C. R. Keyport, whose term of office expired at that time, was re-elected, receiving 42 out of the 43 votes cast, the Doctor, evidently not believing in voting for himself. It was a fine compliment for Dr. Keyport and shows that he has the utmost confidence of the people. He is deeply interested in the school, and where he stands, and as in his own affairs, uses the best of judgment.

After the close of the business of the meeting, the President gave the people every opportunity to ask questions and offer suggestions for the improvement of the school. Mr. Bates gave out a list of the teachers for the next year, as follows:

Teachers for 1928-29

Supt.—Rolland M. Bogue, Ypsilanti
Principal and Coach—Lavere Cushman, Mt. Pleasant
Latin and French—Neva Stinchcomb, Alma-Grayling
Science—Roselin Lewis, Gaylord
Commercial—Eva Francis, Dorris Lake
English—Cathryn Lee, Flint
English and Public Speaking—Charles J. Hill, Ypsilanti
History—Helen R. Esteo, Shepherd
Home Economics—Tina Lindstrom, Sault St. Marie
Public School Music—Doris Quackenbush, Ypsilanti
4th Grade—Thana Smith, North Branch
6th and 5th Grade—Lila Ashdon, Mancelona
5th Grade—Evelyn VanDyke, Mt. Pleasant
4th Grade—Vella Hermann, Grayling
3rd Grade—Louisa Sibley, Vanderbilt
2nd Grade—Clarissa Dago, Springport
1st and 2nd Grade—Margaret F. Vio, McMillan
1st Grade—Hazel Cassidy, Grayling
Kindergarten—Norma Burdette, Manistiquie

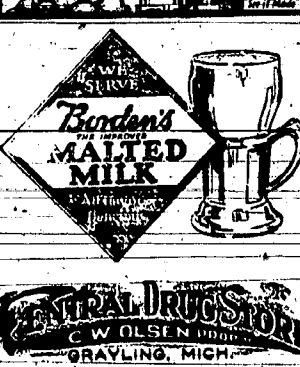

Plan Before You Build

Many people make the mistake of not planning carefully before they start to build and their errors cost them money. One of the first things to consider is the plans. Then you want to know that your home is to be built of the right kind of material. Let us give you the benefit of our experience in selecting just the right material for you. We can save you time, money and worry, and we will win a steady customer.

AGRICULTURAL NOTES

Dairymen interested in the comparative profits obtained from purebred and grade dairy cows may get information on this subject in Circular No. 26-C, "Comparison of Purebred and Grade Dairy Cows." Write to the U. S. Department of Agriculture, Washington, D. C., for this circular.

It is often a mistake to cut small trees, says the Forest Service. Much of the wood goes into the slab and sawmill, and what is taken makes only a small scale of lumber which is of low grade and low value. Young trees are growing rapidly and usually making the highest net money return to the landowner.

Success in the buying of feeder cattle and selling of fat cattle depends largely upon knowledge of the market conditions at various times of the year. A cattle feeder may have ability to produce large gains at low cost, but these gains are not necessary for good profits. A successful feeder should have some knowledge of the trends of the cattle market and should know that the demand for certain grades of cattle varies in different seasons. Medium and lower grades of cattle usually reach their high point before July, but well-finished steers of exceptionally good quality generally sell for higher prices in August than at the beginning of the summer.

Nitrogen is the most expensive fertilizer there is, but a crop of sweet clover when plowed under will add without cost a good supply of nitrogen taken from the air. Sweet clover forage is also high in protein, which is an expensive element in livestock feeds. A second season's growth of a biennial sweet clover may be grazed as pasture from early spring until the plants are too woody to be palatable, which is usually about the end of July. There is no other plant that will furnish as much grazing as a stand of sweet clover in its second season. This crop will grow almost anywhere, provided there is sufficient lime in the soil and enough rainfall. Sweet clover can be stored in a galvanized iron box sterilizer where a steam boiler is not available. This sterilizer consists simply of a box with a tightly fitting lid, which can be made at reasonable cost by any tinmith. The box is set on a gas or oil stove, or on a concrete, brick, or stone foundation to serve as a fire box. A little water is placed in the box and the utensil put on a slatted rack high enough to hold them off the water. If enough heat is applied under the box to boil the water, steam will be generated and the temperature within the box will be raised high enough to kill practically all the bacteria.

Don't use good food to produce lice. Get marketable hen's eggs instead. The food the louse sucks from a hen is subtracted from the supply available for egg production. Look for body lice, for head lice, and for feather lice. You can kill any or all by dusting with sodium fluoride. A dozen "nipples" of powder on each grown fowl will do the business. The application of sodium fluoride by the "nipple method" or by dipping the Department of Agriculture experimenters have found, is the best method known of combatting poultry lice. None of the louse "medicines"

to be used in the drinking water will control the parasites. It is not so easy as that, but time spent in treating loose fowls with sodium fluoride is profitable. All the fowls must be treated or the lice will soon spread from the infested to the clean fowls.

One of the most effective substances to prevent the house fly from breeding in manure heaps is "hellebore." During the summer months fly-breeding goes on most actively and the farmer is often too busy at this season to haul manure away regularly. The best form in which to buy the hellebore for this purpose is as a powder. Add 1/2 pound to every 10 gallons of water, stir it, and then allow it to stand 24 hours before using. Ten gallons of the mixture should be applied to every 10 cubic feet of manure. This treatment will destroy all but a very small percentage of the fly larvae. The composition and rutting of the manure is not interfered with by the hellebore and there is apparently no injury to field crops fertilized with the treated manure.

The Dairy Bull
It is a comparatively simple matter to increase the production of dairy herds through the use of purebred bulls until the herd averages 300 pounds of butterfat a year per cow. As production increases from 300 to 500 pounds, it becomes more difficult to find bulls that are good enough to increase production. A study of 200 dairy bulls each having five or more daughters whose yearly milk and butter records could be compared with the yearly milk and butterfat records of their dams showed that of 9 bulls which were used in herds where the butterfat content of the milk increased or less, every one increased the production of the daughters over that of the dams of the daughters. Of the 40 bulls which were used in herds that averaged between 200 and 300 pounds of butterfat, 44 increased and 5 decreased production. Of the 30 bulls used in herds that averaged from 300 to 400 pounds of butterfat, 17 increased and 28 decreased production. Of the 10 bulls used in herds that averaged over 400 pounds of butterfat, 10 increased and 0 decreased production.

Intractable Elephants
When you are contemplating the elephant in the circus or the zoological garden, the chances are that you are looking at an Indian animal, but hunters tell us that the African elephant is a much handsomer specimen and much more vicious. Not more than three have been taken out of Africa. They are practically intractable and while the Indian elephant may be tamed, this is not possible with the African.

Slaves Expert Workmen
During the slave period most of the South's skilled mechanical work was done by negro artisans. The fine old Southern mansions were the product of negro carpenters. Machine shops, glass and tin smiths and even the railroads were in a large measure manned by negro slaves. They were in such demand many were able to hire themselves out and thus purchase their freedom.

WHAT THE DEPARTMENT OF CONSERVATION IS DOING

Lansing, June 11.—The United States Forest Service has started the expansion of work on the establishment of national forests in Michigan. Government officials have come forward with an offer to purchase State-owned lands in certain parts of the State. The Department of Conservation at a recent meeting voted to accept the offer of the Federal authorities. It approved the sale of lands within the national forest units located in sections of Iosco, Alcona, Oscoda and Ogemaw Counties and other lands in Chippewa, Alger, Schoolcraft and Delta Counties. The first group is in the lower peninsula while the latter is above the Straits of Mackinac.

Michigan will gain materially by this move. The government has promised to do exactly what the State is accomplishing and in addition will pay for the privilege. The Federal foresters will plant the land as well as provide adequate maintenance and fire protection during the ensuing years of growth. Federal men are already busy in Ogemaw County appraising the land.

Lansing, June 11.—Persons interested in learning about the State parks may gain valuable information by writing to the State Conservation Department, Parks Division, and requesting copies of the new maps which are now available. These maps show all the principal highways, the State Park locations, data relative to their suitability for fishing, etc. These maps are furnished free of charge.

Lansing, June 11.—Michigan has launched an intensive campaign that has for its goal the material expansion of State-owned forests. The Conservation Department has approved a plan for several projects that are of sizeable links in the forest chain that the Wolverine state is welding. In Oscoda County, the Commission ordered that a tract of 12,000 acres be brought under administration before next winter. This means the erection of headquarters buildings at once, the running of fire lines and the laying of groundwork for other protective measures so that planting may be started in 1928.

Planting of trees is to be started on a 9,000-acre tract in Presque Isle County this fall. It will be administered from the Black Lake Forest. Fire towers, telephone lines and fire lines will be installed this summer at a beginning cost that should not exceed \$3,500.

The so-called Island Lake Forest located in Kalkaska and Grand Traverse Counties, which was offered to the State by the Michigan Forestry department, but which was not accepted, is now to be considered an annex to the Isle Lake Forest and development will start immediately. Fire towers, telephone lines and fire lines will also be installed here at an approximate cost of \$4,750. Planting should get under way this fall.

Forestry development in the Upper Peninsula presents many difficult problems. This has been recognized for years. The State is continuing to work in the State to wherever conditions permit. Forester Schauf, the State's chief, has been instructed to observe other large tracts of land in the Upper Peninsula and report where in his opinion reforestation may be started to advantage.

To keep pace with this expansion project, it has been found necessary to plan for nursery enlargements. This means the construction of a new well-extending house, a packing house, and a seed storage building. It is expected that these items will not exceed \$25,000 in cost.

The new offensive in the Forestry Division will tax the time of Forester Schauf so the Conservation Commission has approved the engaging of a competent assistant.

E. M. T. 1928 GUIDE RECEIVES APPLAUSE

Commendatory comments are being received by the East Michigan Tourist Association upon the 1928 Tourist Guide and Directory. The Guide contains 128 pages of interesting information besides an insert map of Michigan in colors. One of the features of the book is the section containing maps of counties which subscribe to the association through the board of supervisors with write-ups on the counties.

Other information includes, brief write-ups of cities, towns, villages and lakes, with local information lists of Michigan birds, fish, trees, mammals, wild flowers, synopsis of minerals. East Michigan road logs, railroad, bus and steamboat time tables; digest of Michigan fishing laws; list of Michigan state parks, etc.

The guide is probably the most complete book of its kind ever issued in Michigan.

Rubicon, as It Were

The school teacher had asked for an instance showing how the physical features of the country had affected our development of history. One bright lad offered the following: "If it hadn't been for the Delaware river, Washington couldn't have crossed it."

Jess Sweetser Coming Back

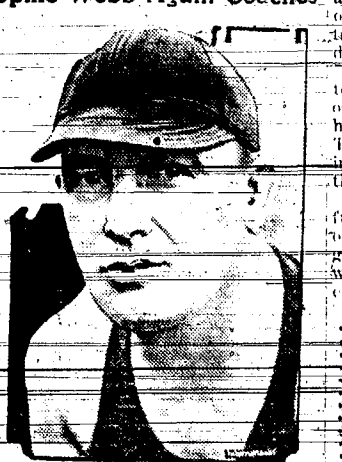

Apparently recovered from the illness that struck him after he had won the British Amateur championship in 1926, Jess Sweetser plans a comeback campaign this year that he hopes will lead him to another national amateur golf title. He has mapped out a program that will bring him into three tournaments this summer with the national amateur as his chief objective.

Indians Take on Ward

Clasped will have a place in Aaron Ward this year even though that place is on the bench. He's a valuable kind of thing to have around. Club Manager DeWitt and Peck teamed with him last year on the White Sox and should know. Aaron has been fitting himself for regular duty in the infield in case there is an early season vacancy.

Spike Webb Again Coaches

The photograph shows the veteran Spike Webb, coach of the naval academy boxing team, who has once more been given the assignment as coach for the American Olympic boxing team. Webb coached the boxers who went to Antwerp in 1920 and at Paris in 1924. Then teams ran on with him for honors.

Raymonde Allain

Mlle. Raymonde Allain, who was chosen as the prettiest girl in all France to represent her country at the International Pageant of Pulchritude at Galveston, Texas,

DURANT

BREAKS ALL RECORDS FOR THE PAST FIVE YEARS

In May, Durant Plants shipped 18,125 cars, exceeding April by 15.4% and the best previous record since 1923 by over 29%.

This is no chance occurrence—it is a result of consistent gains begun last Fall, when the main plant at Elizabeth, New Jersey, broke all records for September, October and November.

March, April and May have exceeded the best previous three months' total for all time at the Elizabeth Plant by 57%.

At the close of business of each of these months there have been more unfilled orders on hand than ever before in the company's history. Even with this record-breaking May production the same condition holds true.

THIS BRILLIANT SUCCESS IS UNIVERSAL

In California*
One of the world's most critical buying markets, the Durant line was FIRST or tied for first place in 72 cities and towns in the month of April; SECOND or tied for second place in 47 cities and towns.

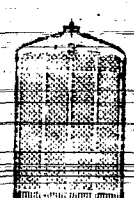

In New York, Chicago, Los Angeles and Detroit*
Key cities of the industry, Durant showed a gain of 11.9% in registrations for the first three months of 1928 over the corresponding period of 1927.

In All States*
Durant showed a gain of 19% for the first three months of 1928 over the corresponding period of 1927 in spite of the last time due to getting new models into dealer's hands after January 1st.

In Foreign Countries
April broke all previous export sales records, and shipments for the first four months of 1928 showed an increase of 34% over the same four months period of any other year.
Now, May 1928, has surpassed May 1927 by 300%.

There certainly must be a reason for this continued expression of universal public confidence and approval for Durant Products—Fours, Sixes and Trucks—\$595 to \$1550, f. o. b. Lansing, Mich.

There is an eager purchaser waiting for every Durant car. Have you driven one?

Corwin Auto Sales

MIDLAND'S GARDENS BRING BIDS FOR CONSTRUCTION DEPARTMENT OF CONSERVATION

(By E. M. T. Service)
Midland, county seat of Midland county, has several distinctions. The gardens are one, probably as true for Midland as any other county seat in Michigan.

Midland's gardens are attributable to the initiative of H. H. Dow, head of the Dow Chemical plant, for years Crawford County at Grayling, Mich. This year he hired a landscape artist in Detroit and placed his services at the disposal of the residents.

Mr. Dow has on his estate beautiful gardens which attract thousands of visitors annually. The 70-acre grounds are open to visitors twice a week, and guides are provided to escort the visitors in these occasions.

Midland's gardens are attributable to the initiative of H. H. Dow, head of the Dow Chemical plant, for years Crawford County at Grayling, Mich. This year he hired a landscape artist in Detroit and placed his services at the disposal of the residents.

Whole wheat in wholesome form

The whole wheat—all of it, and nothing else, is in Shredded Wheat. None of the healthful qualities, not even the bran is lost. And better still, the grain is steam-cooked, shredded, formed into large loaves and baked all the way through. This is not just to bring out the flavor. It insures easy digestion and enables grand-fathers as well as grand-children to secure the full benefit of nature's most important food.

When Does a Man Stop Loving?

Dr. Will C. Durant, author of "The Story of Philosophy" has stated that a man past thirty is incapable of love.

This statement threatens to break up innumerable happy households, and has brought forth a storm of criticism and argument throughout the country.

A galaxy of literary, dramatic and artistic stars answer his statement.

Read what Ring Lardner, H. L. Mencken, George Ade, Fannie Hurst, and many others, have to say on the subject.

We Publish a Series of Shrewd, Amusing, Witting Answers to Mr. Durant's Amazing Proclamation.

Here's a Chance to Find Out What Your Favorite Writers and Actresses Think About LOVE!

Read the Series in The Avalanche beginning this week

Is THIRTY the Love Deadline?

Will Durant was born in North Adams, Mass., in 1885, and was educated in the Catholic faith by the Jesuits, receiving from them a degree of B. A. in 1907. After a period of newspaper work, he became a professor of Latin, Greek, and French at Seton Hall. For the next ten years he devoted himself exclusively to scholarly pursuits, which included a trip to Europe and extensive study at Columbia in 1912. "The Story of Philosophy" was published several years ago, and has now reached 1,000,000 copies. At the present time when engaged in lecturing through the country, Dr. Durant lives in New York City and writes for the magazine. He is married.

By WILL DURANT

And now what if I never said it at all? And if this report of my denying the possibility of love after thirty is as untrue as the famous philosopher's remark that all men should shoot themselves at thirty-five? Slowly I am learning my lesson: I must never joke with reporters. They will quote me without the smile, and they will be certain to ignore modifications.

But it would be a shame, now that this learned discussion has gone so far, to say that the commission has a purely imaginary source. Perhaps the best thing to do in the premises is to set down what really was said (with sundry improvements that come as afterthoughts) and to indicate what basic problems lie at the root of our rather frivolous debate.

The original query was intelligent and fundamental: Can we restore the old moral code? If it is a good question because it suggests the possibility that the old code is permanently gone, and that our current "immorality" is but a groping trial-and-error transition to a new code of honor and decency.

For the old code was developed with an agricultural society in view; it assumed a brief adolescence and a rapid arrival of the male at economic self-sufficiency; it assumed that marriage would come early, and that children would come early and often. On the farm it was cheaper to marry; the wife was an asset, not an ornament; the children soon earned their keep, and became profitable investments of one's energy; therefore marriage came young, motherhood was sacred, and birth control was immoral.

And in the complex industrial life of the city men attain self-sufficiency late, and in the middle-class luxury of a wife is an expensive luxury; that only the poor can afford to marry; children are frowned upon by landlords, and cannot earn money for us till they are fourteen or sixteen; immigration, and the suction of the city upon the country, replenish the population very well; the streets are so littered with children that they interfere with our eight-cylinder Jagernauts; there is no evident necessity of adding to their multitude.

Above all, the advance of medicine, sanitation and parental care has reduced the death rate to a fraction of what it was; the birth rate had to come down, or else Ecclesiastes and Malthus would have been right in believing that when goods are increased, they are increased that consume them, and the last condition is as bad as the first. So the commandment to breed and multiply loses its urgency in the city marriage comes late, and

children are an oversight or joy. But that necessity, which makes all sound morality no longer requires large families; early marriage is not indispensable for the maintenance of the race, and birth control, which the three and virtuous Tolstol condemned as a great sin, is taken up by the nicest ladies in the land. All things change.

Consequently there is no necessary permanence, nor any inherent holiness, in the moral code which came down to us with our religion and our politics. "Immorality" is mostly other people's morals, or the morals of other days. As the industrial revolution altered our lives, destroyed our homes, packed us into apartment boxes, replaced the family with the individual and the state, subjected religion to science, and art to industry, so it is rapidly dissolving the moral code developed in and for an agricultural age. Invention, which is the mother of progress, is transiently the nurse and instrument of our "immorality." Adolescence lengthens, and maturity of mind and character like maturity of means, comes nearer thirty than twenty. A man of thirty is young now, in body and soul; woman, who in the past was old, decrepit and trustworthy at forty, now retains her beauty into the "dangerous age"; and if Balzac were alive he would write with admiration of la femme quarante ans—the woman of forty years.

Perhaps in the end, sexual development will also be delayed; and then a new adjustment of nature and industry may come, with inter-puberty, a longer period of growth and education, inter-marriage later, elicitly, and a lengthened life when that higher level of health, power and thought than ever before. The prolongation of adolescence lifted man from brutality to civilization; which of us can tell the limits of that further prolongation of adolescence which goes on today under our very eyes? Is Bulwer's "Coming Race" about to appear?

Meanwhile, however, the interlude is chaos. Many of our people are of south-European origin, and will carry with them, for several generations, a racial habit of sexual precocity. The city will continue to stimulate desire, and to discourage marriage; everything will hinge upon that. Prematurity will increase, and women will achieve the "single standard" by limiting that of men. Men will have many loves, and live through them; and then, at thirty or so, they may marry. An increasing number of them will never marry at all.

Here at last we touch our original question: Can marriage, postponed until thirty, be ever a real love-marriage, even anything more than a "marriage de convenance," with the banker playing the role of the father? Can a man love at thirty? Doubtless he can lose his head in the heat of desire; there is no age that is safe from infatuation, and Goethe at seventy could propose to a girl of sixteen. But could he have fallen at her feet in adoration? Could he have surrendered to her his Olympian egoism, and lost all thought of self in devotion to her? Could his love be no mere itching of the flesh, but a hunger and thirst to do services to the loved one, to be near her and feel the warmth of her presence and her comradeship?

Perhaps this full flush of love, more spirit than body, more devotion than desire, comes only to the young; and middle age seldom knows it except for one who has been loved from early years through all the fluctuations of desire and through all the vicissitudes of fortune. (Our question is not whether one dies at thirty, but only whether love in its full flower can come to a man of thirty for a woman whom he has not loved before.) It is a pity that when such complete love comes it is not permitted, in our cautious days, to weld the lovers into a marriage that shall be a vow burned in with the instilled emotion of youth, rather than a physiological partnership entered upon with the cold rationality of middle age, under the inspiring supervision of an older man.

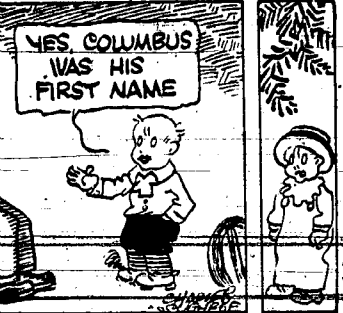

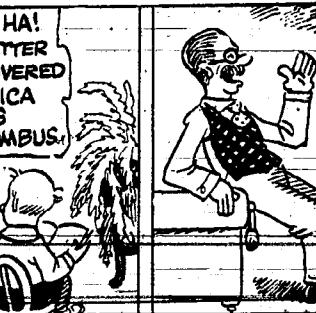

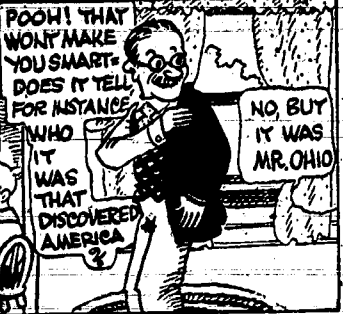

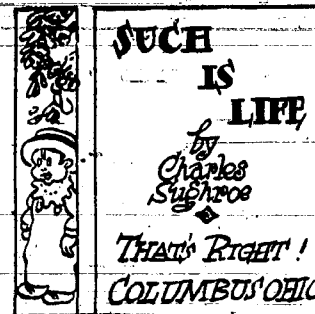

The tragedy remains in this dwelling time that we love profoundly and limitlessly, and do not marry; that later we love again, less profoundly and intensely, and do not marry; that later we love once more, very moderately and reasonably, with an eye on the ledger—and marry. How can a man feel all the delightful spontaneity of love after ten years of adventure in erotica? We are then, in Bulwer's phrase, getting ready to play on a violin.

It is true that youth is not wise enough to make vows forever, that love-marriages, like other marriages, fall upon many rocks; but who has proved that middle age, in these matters, is wiser than youth? Youth is never so foolish in adoration as middle age is in desire. And what if love must end, never having been dowered by nature or instinct with an easy permanence; is it not better to know it to its limits, the competence to open every door of the soul to it when it comes? The pessimist broods over the brevity of all good things; the optimist resolves to enjoy them while they last.

The last word should be one of philosophy: there is always a slight possibility that we are wrong, and that time will smile at—or ignore—our analysis. Who knows but that our generosity of necks and knees, our replacement of professional with amateur promiscuity, our reduction of women to appetizers and desserts, short-term investments, and show-windows of our male prosperity, may be but an interlude between two ages of control?

As one mingles for a stiffed moment in Broadway's big parade, and observes the riotous emancipation of an instinct once subservient to reproduction and the race, the triumph of liberalism leaps to the eye and the mind; and one wonders if this immoderation, too, like bitter Puritanism, may not bring a reaction that will swing us back helplessly to an extreme of suppression and restraint?

Many times in the past man has

experimented with marriage and the family; among the Greeks love could not claim even the moral status of Broadway. But we experimental variants are from the center of our great cities, and we are at once in another world, a world in which there still are homes. Possibly our world will conquer and absorb that one, drawing all the country magnetically into cities, and all the cities into the new life and the novel code. But perhaps the family and the countryside will win; perhaps we of the cities are ultimately sterile, and flourish only because of the health and vigor that flow to us in every generation from the village and the town. Let that stream run dry, and we shall face again the problems of reproduction and continuance; the species will assert itself anew against the individual; love may once more mean marriage, and marriage children. We are sports and freaks, and the race may pass us by.

It is just possible that when we are gone posterity will not care to imitate us, and that the world which we make, heavy with wealth and bright with young ideas, will be inherited by the children of those who stand aside from us today, looking with doubt upon our great cities, and with pity upon our careless joy. It would not be the first time that the race had triumphed over the individual.

(By Congressman Roy C. Woodruff.)

THE WEEK IN WASHINGTON

In the absence from Washington of Members of Congress since adjournment, the House and Senate Office Buildings have taken on a more or less abandoned look, with the doors of the offices closed and notices appearing thereon that the Representative has gone home. The Capitol Building is thronged with sightseers all day, however, as it seems to be the pivotal attraction to those coming to Washington. The Executive Department of the Government is turning full blast as usual, and will continue to do so as long as appropriations are forthcoming from Congress. The Legislative branch of the Government passes the laws, appropriates the money, and then the Members of Congress go home to get the contact with the people that is so necessary for guidance in charting the course for the next session. The Executive Department adopts regulations for administering the laws that Congress enacts, and the money appropriated, and get ready to ask for more. The Judicial Branch, as represented by the Supreme Court which sits in Washington in what was formerly the Senate Chamber in the Capitol, recessed June 5th until October 1st, and the Justices have for the most part left the city for their summer homes or to travel. The intense strain they are under while in session, the long hours they observe to hear the important cases, far reaching in their effect upon the economic life of the nation, leaves no room for doubt that they have earned the vacation they are entering upon.

I keep my Washington Office open all the year around for the accommodation of constituents who have matters to transact through me with any branch of the government, although I shall return to Michigan shortly after July 1st to remain in the district until the reconvening of the short session of Congress in December.

I hesitate to make any prophesies regarding the outcome of the National Conventions, which are now taking up so much space in the newspapers of the country, because it is idle to speculate about an unknown quantity. Personally, I have been strong for Secretary Hoover ever since he announced that he would be a candidate, believe him to have all the qualities an aspirant for the Presidency should have. His talent for developing natural resources and applying fundamental principles of engineering to all problems as illustrated in his career as a mining engineer and as head of the great Department of Commerce, convinces me that he would bring to the White House an ability as a constructionist that would insure the country having an era of continued prosperity and progress of our population. He is a quiet and unassuming man. He has no visible trace of egotism in his makeup, nor does he impress one as wanting to impose his will upon others regardless of differences of opinion that exist. He was a guest at a dinner I attended a few weeks ago given by Senator Vandenberg of Michigan at the Senator William Alden Smith, which the members of the Michigan Delegation in Congress were present. Mr. Hoover and his charming wife captivated us with their unassuming ways and friendly presence. In my official contacts with Mr. Hoover and his Department, the integrity of purpose which he has always displayed commended him to me and caused me to conclude that his candidacy should appeal to all men of progressive thought, Senator Borah, a progres-

sive of the progressives, has announced recently that he is prepared to support Mr. Hoover. The Senator has been busy drafting a tentative platform for the consideration of the Convention. This he has submitted to Secretary Hoover and his lieutenants, and it is reported they agree in principle with the plans he advocates, which are as follows:

1. Vigorous enforcement of the prohibition laws and opposition to the repeal of the eighteenth amendment.

2. A definite promise of full publicity of all future campaign expenses.

3. Recognition of the idea that the power trust is a Federal problem with which the government must cope.

4. Reiteration of the Republican party's determination to strictly adhere to the existing reservations to American entrance to the World Court.

5. Declaration of a "hands-off" policy in Central America and the right of each nation there to manage its own affairs.

6. Reaffirmation of the Republican party's objections to American membership in the League of Nations.

7. A promise of party support for the Kellogg proposals for the conclusion of a multilateral treaty renouncing war.

8. A pledge for a review of existing tariff schedules and provisions to give better protection to the farmer. This would include a surances guaranteeing the American market primarily to the American farmer.

9. A party pledge to aid agriculture.

Afternoon Frock

The cape theme, which strikes such an important note in this season's smartest fashions, is used to achieve a graceful effect in this charming afternoon frock of water-blue chiffon worn by Thelma Adams.

Note how gracefully the cape is employed, so that a novel and original effect is achieved through the cape falling over only one arm in rippling fashion. The diagonal neckline, seen on so many of today's smartest frocks, accentuates the one-sided effect of the frock. Note, too, the large soft bow attached with a rhinestone pin at the neckline.

The skirt is box plaited and the blouse is shirred in front to affect the fashionable light, delicate line across the hips.

A large picture hat adds a further summery tone to the costume.

'Spose You Try It

What is half of twelve? Why any child of Gurf can answer that. Six of course. A bright young correspondent, by using Roman numerals, asserts that the answer is seven, that half of 12 is 7, and this is how he gets that way: XII is 12, he says. Now draw a horizontal line cutting XII exactly in half, and you get VII, which is 7, he says. Now, what do you know about that?—Fall River Herald-News

Human Engine Needs Sugar

Sugar is the quickest, cheapest, most and most generally efficient fuel for the human body. It begins to burn within about five minutes after it has been consumed. That is why it is so valuable in the diet of those who do heavy physical work. James A. Tobey explains in Hecol Magazine.

NEW TYPE AMPHIBIAN PLANES

According to a bulletin from the U. S. Navy Recruiting Station at Detroit, the Navy Department has awarded a contract for twenty new-type amphibian planes. The total cost involved is \$500,000, which is quite a sum to keep the "eyes" of the fleet up to standard. The new planes will be equipped with Wasp air-cooled motors of 425 horsepower. They will carry a useful load of 1500 pounds including fuel, radio, machine guns and bombs. The wing spread is 45 feet and the total weight is 3249 pounds. The crew consists of three men, namely, two pilots and one observer. All men enlisting in the Navy at the present time are given a chance to qualify for Aviation duty.

Mrs. Frank Woodruff, who was here visiting her daughter, Mrs. Clarence Brown returned Sunday to Bay City.

Miss Vera Matson of Detroit is spending the week here visiting her parents, Mr. and Mrs. Elmer Matson and friends.

Saddle horses for men, women and children at the Grayling Riding stables, opposite Model Bakery, Central Drug Store.

Mrs. Holger Hanson is in Burt, Mich., where she went to attend the funeral of a relative.

David LaMotte, who has been in Detroit doctoring is expected to return home tomorrow.

Mr. and Mrs. Frank Green and son Rex of Hudson arrived Wednesday to spend the week camping on the Manistee river.

Otto Mahnke, who has cooked in the Salling Hanson Co. camps for many years has been hired as caretaker at the "Pines".

Next Saturday, June 16, will be Grange Memorial day. It will be an open meeting and anyone wishing to meet with them is cordially welcome.

Leave your order for milk to be delivered at Lake Margrethe at the Grayling Creamery, phone 913. We make delivery at 6:00 a.m.

Mrs. Signa Rasmussen, accompanied by the Messrs Poul Jensen and Ole Wiim, of Detroit, visited at the home of her parents, Mr. and Mrs. Jens Ellerson over Sunday.

Mr. and Mrs. Ora Ingalls of Flint are the proud parents of a daughter, Betty June born at the home of the former's parents, Mr. and Mrs. Clarence Ingalls, Sunday, June 10.

Esbern Olson, Louis Heribson of this city, Robert Lamont of Bay City and William of Mackinaw enjoyed a fishing trip of one of the lakes at the Canadian Soo over Sunday. All got the limit.

Golf enthusiasts will be glad to know that they will soon be able to purchase Walter Hagen Golf equipment at the Central Drug store, as they are to handle this line.

Mr. and Mrs. Peter McNeven and family are enjoying a visit from Mrs. P. D. Russell and her daughter Mrs. Murphy and little son Russell from Emporia, Kansas. Mrs. Russell and Mrs. McNeven are sisters.

Several auto loads of friends drove out to the home of Mr. and Mrs. John LaMotte, located 7 miles south of Grayling on U. S. 27, Saturday night to help Mrs. LaMotte celebrate her birthday. She was agreeably surprised.

Misses Margrethe and Ella Hanson arrived home last Thursday from Bennett School, Millbrook, N. Y. for the summer vacation, accompanying their mother home, the latter who had been at Millbrook to attend the graduation exercises.

Mrs. Harrison Cameron and on Meredith of Detroit arrived Friday and are visiting old friends here, the latter enjoying meeting his old school mates. The family moved to Detroit from Grayling a few years ago. They are guests at the home of Mr. and Mrs. S. D. Dunham.

The store building vacated by the H. Peterson grocery is receiving a lot of interior painting and redecorating and the Kraus Estate hardware is being moved into it. This will be known as the Grayling Hardware. The old Kraus hardware store is being somewhat changed. The front windows are being lowered to give better display space.

Neighbors and friends of Mrs. Harvey Wheeler tendered her a farewell party Saturday evening, as the family expect to leave shortly after school closes for Pontiac, where Mr. Wheeler has been employed for several months. Three tables of cards were enjoyed and the guest of honor was presented with a lovely gift. A pot luck lunch was served late in the evening.

I have opened a fruit and vegetable store in the Burton Hotel building, where you may buy fresh fruits and vegetables at lower prices than you can buy elsewhere. I have been coming to Grayling the past three years trucking fruits and vegetables and so am not a stranger here. Everything strictly fresh and in first class condition. Give us a call.

Oscar Robarge.

Hans Petersen closed his place of business on Michigan avenue Saturday night and started at once to moving into his new quarters on Cedar street, one block north of Main street, recently vacated by the A. & P. Co. On Monday morning his new store was serving its customers in the usual manner. The store is now pretty well settled. The stock Petersen says his old customers are finding him just as easily as they did on Main street. Same reliable service and same high quality of goods will be the principle of the store he says. The phone number remains the same—No. 25.

See the women's and children's new slippers that just arrived at Olson's.

Mrs. Harold Millard and children of Flint are visiting her parents Mr. and Mrs. Simon Sivrais.

Don't forget that we carry Daniel Green Comfy slippers at Olson's.

An alarm of fire at 5:30 o'clock last evening caused a lot of excitement as a terrific wind was blowing. Someone saw smoke coming through the doors of the Neils Olson garage and the alarm was given. Mr. Lester Olson was working on his car and the smoke was only exhaust coming from the car.

Enos Jennings and his bride arrived yesterday from Detroit and are visiting his mother, Mrs. Frank Jennings. The young couple were wed last week. Also Mrs. Jennings is enjoying a visit from her son Steven and her daughter, Mrs. Fred Harland and little son, also of Detroit.

Ellsworth Lauridson entertained 16 boys and girls at dinner at his home Tuesday evening, the occasion being his 14th birthday. Banners of baskets filled with nuts were given to each guest and after dinner Ellsworth took his guests to the movies. He was the recipient of many nice gifts and he proved a royal host.

Mrs. David White was guest of honor at a surprise birthday party at the home of her daughter, Mrs. Tracy Nelson, Saturday, the affair being given to celebrate her 61st birthday. Cards were enjoyed and Mrs. White was presented with several gifts. Mr. and Mrs. L. V. Cranford and Mr. and Mrs. Lawrence Goodrich motored up from Flint for the occasion. There were several other relatives and friends present.

John W. Blodgett of Grand Rapids is in the city where he is gathering plans for the construction of a memorial building for the Hartwick Memorial pines park. Mr. Blodgett's father was in the logging business during the famous pinery day and as a young man the former became very familiar with logging conditions. It appears that Mr. Blodgett made a wise choice in Mr. Blodgett for person to head a committee to plan the memorial. In a conversation with Mr. Blodgett it is learned that the memorial will be built up around an old time pine logging camp, comprising the usual bunk house, mess hall, stables, office, etc. In these structures will be furnishings, relics of the old pinery days. The job has been put up to Mr. Blodgett by the Governor, including the construction of a suitable highway to the park.
